

JACOB AND BFM[®]: THE PERFECT FIT

FLEXIBLE CONNECTIONS FOR YOUR PIPE SYSTEM

It is often necessary in pipe systems to absorb vibrations and oscillations, and to decouple individual parts of a system from one another. To achieve optimum results, JACOB and BFM® have combined their systems into one product: The BFM® spigot is now available through JACOB with a 6 mm lip for pull-ring connection so that the unique BFM® flexible connection can be installed easily into a modular pipework system in seconds. It is formed from two spigots and a connector made from exceptionally resilient polyurethane. The innovative snap-in design allows the connector to click in to the double beading of a matching spigot by means of an internal metal ring. No tools or welding are needed for installation.

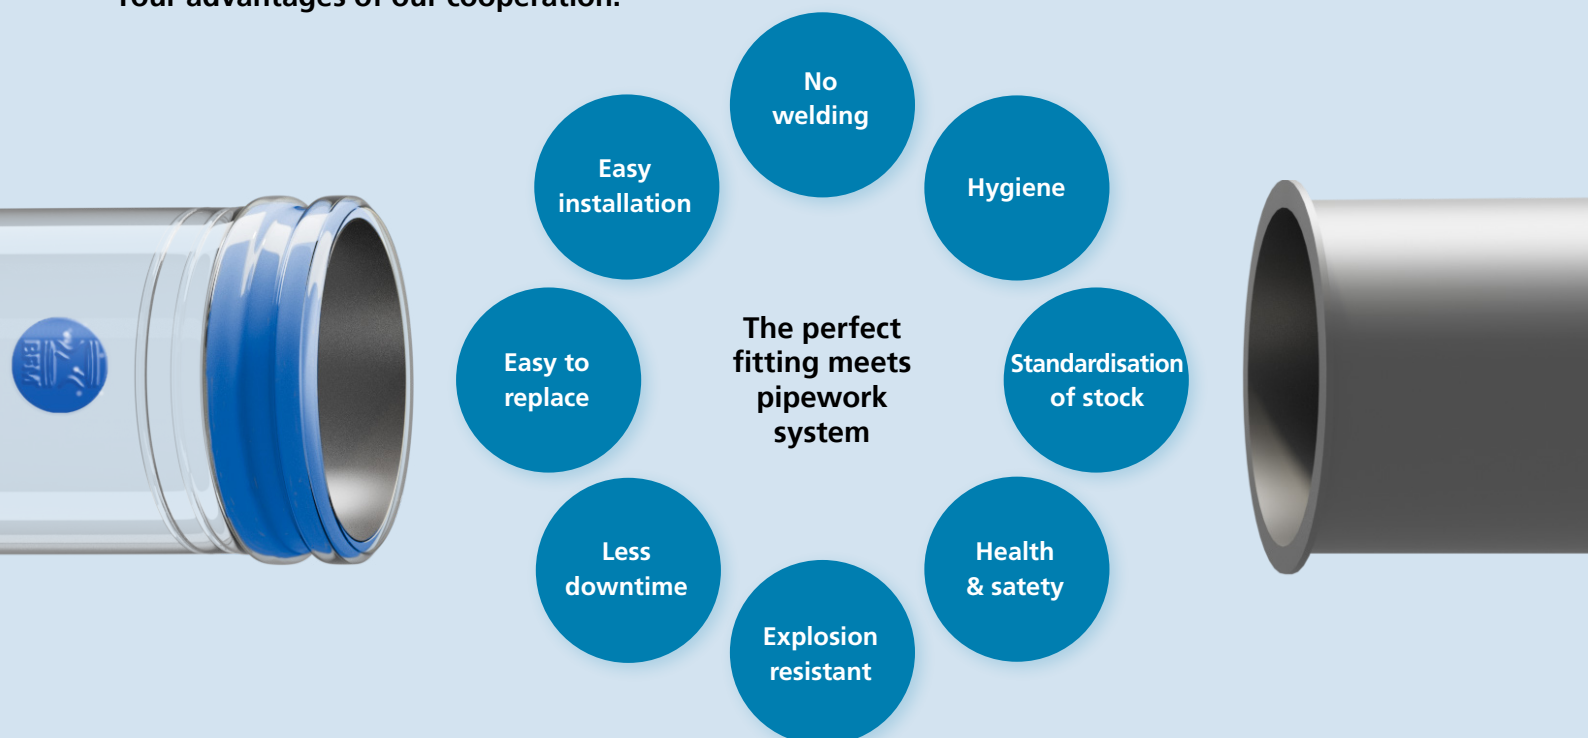

The BFM® system also meets FDA and EC 1935/2004 requirements, just like the JACOB Food Grade range. This means that these products are suitable for use in industries

that demand the highest standards, such as foodstuffs, pharmaceuticals or chemicals. The compensators can be used in ATEX environments under certain conditions.

One connector system – many advantages

- Fits easy into the JACOB pull-ring system
- No tools needed for assembly
- 100 % dust tight
- Less wear, higher durability
- Quick assembly and disassembly for maintenance and cleaning
- Suitable for foodstuffs:
FDA and EC 1935/2004 compliant

Your advantages of our cooperation:

The JACOB and BFM® product range

Diameter: DN 100 to DN 400 with 6 mm lip for pull ring connection. Each compensator consists of two spigots and a connector.

Spigot: 83 mm long with 6 mm lip for pull ring connection, stainless steel 304L

Wall thickness: DN 100 mm: 1.5 mm, DN 150 mm and larger: 2 mm

Pipe fittings: Type Seeflex 040 E, thermoplastic ether-based polyurethane coating, wall thickness: 0.9 mm
