JACOB
NO. 1 IN PIPEWORK SYSTEMS

JACOB IS EXPANDING ITS PORTFOLIO

Diameter 160mm is now part of the Jacob pull-ring system. Most importantly of all, pipe systems with the nominal diameter commonly used in ventilation systems now benefit from short installation times and a perfect seal. In the standard product range, you can also choose from standard connecting flanges and cone adapters. This way, you can connect your machines conveniently and safely with the JACOB modular pipework system.

Your advantages at a glance:

- We are adding DN 160 mm to the JACOB product portfolio
- JACOB pull-rings for tightness and flexibility
- U-shaped seals made of EPDM, silicone and FKM, vulcanised and tear-resistant quality and FOOD GRADE
- Electrically conductive powder coating in RAL 7032 and stainless steel in FOOD GRADE are suitable for contact with food
